

FARM HAITI - ROOTED IN GOD

Growing in Faith. Bearing Fruit for a Better Tomorrow

Our 2025 tagline based on Psalm 1:3, brings us back to our roots. Mary's reason for moving to Haiti twelve years ago was to share the love of Jesus. We are excited to return to this original foundation, still with the emphasis of empowering others for a better future.

Back to our Roots: Making Disciples and Economic Development

We had the honor of hosting Jerry Jefferson, Director of Disciple Multiplication from Heaven's Family, Punxsutawney PA. Jerry spent a week teaching us a very simple and duplicatable method on how to make disciples. It is a powerful dual system of teaching others about Jesus' love through bible groups, calling God Love Groups (GLG), and creating economic development, using

Farming God's Way. Jerry was a huge encouragement to our FARM Haiti team, and we immediately implemented what we learned.

Our Youth ~ Bearing Fruit for a Better Tomorrow

FARM Haiti is equipping young people with agricultural skills and biblical principles through hands-on learning and community engagement. Youth participants learn sustainable farming techniques based on the principles of "Farming God's Way." This includes soil conservation, water management, crop rotation, and using natural methods to maximize yields while caring for the environment. The program integrates spiritual lessons with practical farming skills, emphasizing stewardship, responsibility, and gratitude for God's creation. Youth are taught the value of prayer, discipline, and trust in God as they cultivate their gardens. Young participants are provided with a garden where they plant, maintain, and harvest crops. As the crops mature, the mothers come to pick the vegetables they need for meals. The kids beam with pride, knowing, because of their hard work, the family will eat well.

Pilot School Curriculum Program

We are pleased to announce that we kicked off our pilot program for teaching Farming God's Way in a local school. Twelve students ranging from 11-16 years of age are participating. They learn to grow sustainable food for their families while developing life skills. The program encourages youth to become leaders in their communities by sharing their knowledge and inspiring others to adopt sustainable practices. Beyond farming, the program emphasizes essential life skills like teamwork, problem-solving, and financial literacy. Participants learn to manage resources and understand the economic potential of agriculture. Semester 1 is almost complete, and 2 more semesters are being planned.

July 25 Summertime Fun-Save the Date

Block off Friday July 25 on your calendar for a fun evening of food, comedy, and competitive bidding. Eat well, laugh hard, bid recklessly. Leave with a dessert you didn't need but will buy anyways. Invites coming soon...

Rooted in God, Growing in Faith, Bearing Fruit for a Better Tomorrow

Thank you for being part of our mission. Let's continue to grow together in faith and sustainability!
